Preface ix
Abstract 1

1 Introduction 2
1.1 Elements of Protology 3
1.1.1 Philosophical Concepts of the Origin of the World 3
1.1.2 Mythological Cosmology 6
1.1.3 Biblical Concepts of Creation 6
1.2 Toward a Science of Creation 10
References for Chapter 1 11

PART ONE SCIENCE 13

2 The Universe in Modern Science 15
2.1 The Geometry of Spacetime 16
2.2 The Standard Model of the Evolution of the Universe 17
2.2.1 The Big Bang Model 17
2.2.2 Gravitational Waves 20
2.2.3 The Question of the Origin of the Universe 21
2.3 The Importance of the Unification of Physics for Cosmology 22
2.3.1 In Search of Quantum Gravity 22
2.3.2 The Standard Model of Forces 23
2.3.3 The Birth and Evolution of the Universe 24
2.4 Models for the Creation of the Universe 26
2.4.1 Quantum Models for the Creation of the Universe 27
2.4.2 String Theory 29

2.4.3 Predictions of M-theory 30
References for Chapter 2 31

3 Nonlinear Dynamics and Fractals 33
3.1 Nonlinear Dynamics 33
3.1.1 A Logistic Map 35
3.2 Deterministic Chaos 36
3.2.1 The Lorenz Model 37
3.2.2 Hyperchaos 38
3.3 Fractals and Multifractals 42
3.3.1 Multifractal Models for Turbulence 46
3.3.2 Models and Observations 48
3.4 Implications for Cosmology and the Creation of the Universe 49
References for Chapter 3 51

PART TWO RELIGION 53

4 Science and Religion 55
4.1 The Philosophy of Science 55
4.1.1 Antiquity 56
4.1.2 The Modern Era 56
4.1.3 Contemporary Times 58
4.2 The Philosophy of Religion 62
References for Chapter 4 65

5 Questions of Meaning 67
5.1 The Universe and Meaning 68
5.1.1 The Universe and Humankind 68
5.2 The Meaning of Life 69
5.2.1 Life and Death in Nature 70
References for Chapter 5 73

6 Epilogue 74

Appendix A **The Standard Model** 77

Appendix B **The Structure and History of the Universe** 78

Acknowledgments 83
