

# C ONTENTS

I. Appestat – general characteristics . . . . .	7
Introduction . . . . .	7
Norman Jolliffe; appestat and the prudent diet . . . . .	8
Appetite in a broader and in a narrower meaning . . . . .	10
Appetite in a broader sense . . . . .	10
Appetite in a narrower sense . . . . .	12
Possible appestat loci . . . . .	13
Appestat in the brain . . . . .	13
Appestat in the hypothalamus . . . . .	14
II. Structures and substances. Early concepts, hypotheses and theories . . . . .	17
The ventromedial hypothalamus . . . . .	18
The satiety center hypothesis (1950). The lipostatic theory (1953) . . . . .	20
The glucostatic theory (1952); the ventromedial hypothalamus as the glucostat (1953) . . . . .	21
The lateral hypothalamus. . . . .	24
The feeding center hypothesis (1951) . . . . .	25
The dual-center theory (1954) . . . . .	25
III. Further investigations and controversies . . . . .	31
The irritative hypothesis (1965) . . . . .	31

---

The effect of the ventromedial hypothalamus lesions: no overeating, no obesity (1973) . . .	32
The cephalic phase hypothesis (1977). . . . .	33
The general autonomic hypothesis (1981). . . . .	33
Activitystat (2006) . . . . .	34
The integrative model of habituation of reinforc- er effectiveness (2013) . . . . .	35
IV. Palatability . . . . .	41
Alliesthesia. Ponderostat . . . . .	41
The development of food preferences: the prima- cy effect and the novelty effect . . . . .	44
V. Summary and conclusion . . . . .	49
Apestat. Wybrana problematyka . . . . .	51
References . . . . .	55
